BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWINGS

Figure 1 shows the toothbrush with the interdental hard brush and the gum massager stimulator tip installed and retracted, inside the parallel recess chambers, in the double cylindrical handle.

Figure 2 shows a cross section through the two recess chambers inside the handle.

Figure 3 shows the toothbrush in two sectional views, with the interdental hard brush and the gum massager stimulator tip extended from each parallel cylindrical recess chamber, after the hinged covers are opened.

Figure 4 shows the side view of the toothbrush with both the gum massager stimulator tip and the interdental hard brush retracted, and shows the two buttons that extend these dental tools.

Figure 5 shows the toothbrush with the interdental hard brush extended.

Figure 6 shows the toothbrush with the gum massager stimulator tip extended.

Figure 6A shows a cross section through the handle with the gum massager stimulator tip retracted into the recess chamber, and shows one of the buttons engaged with one of the sliders.

* Figure 6B shows an enlarged view of the engagement of the interdental hardbrush and the gum massager stimulator tip with the internal extension tube providing replacement capability.

* originally Figure 3A
